

A lot of our guests have been coming to Snowshoe for quite a few years and they have really noticed the difference. To quote a long time guest, Jack Senn of Wisconsin, whose group landed numerous 20-26 inch walleyes plus a couple of 31 and 32 inch monsters, *"We've come a long way from 7 or 8 years ago when*

*the best we could do was 17 inches with tons of 14 to 16 inchers. The way the Snowshoe fishery has changed over the years is a great tribute to the new slot size regulations".* Your right Jack.... and if we keep doing things the way we are, it's going to get even better!!. Thanks to all of our anglers for cooperating with the new re.
